**Cloudbreak Analysis**

IBM i2 ANALYST'S NOTEBOOK PRO

5 DAY COURSE
For Intelligence Analysts, Researchers & Investigators

Become expert in i2 Analyst's Notebook in one week with our intensive i2 Analyst's Notebook Pro course. This course covers our i2 I and II courses and provides an opportunity for workshopping specific data problems.

Training Style

This is a hands-on training course where participants learn how to leverage IBM i2 Analyst's Notebook operationally by first learning to create manual charts then moving to cleanse, import, and analyse a wide range of data types.

Prerequisites
Basic IT Literacy

Learning Outcomes

Create well-structured link, hierarchy, and case charts

Apply Conditional Formats to quickly reveal country codes and strength of connection

Import call records, financial, relationship, and social media data

Conduct pattern of life analysis using Bar Charts and Histograms

Find and resolve duplicate entries using Find Matching Entities and Merge

Cleanse data in the importer using Column Actions

Customise i2 for your organisation and sanitise i2 charts for different readerships

Analyse data using List Search, Visual Search, and Layouts

Find connections between multiple SOIs using Find Path and Find Clusters

Publish and brief i2 charts using i2 functionality and create effective data analysis reports
