

# iBase IntelliShare 8

INTELLIGENT SHARING & COLLABORATION

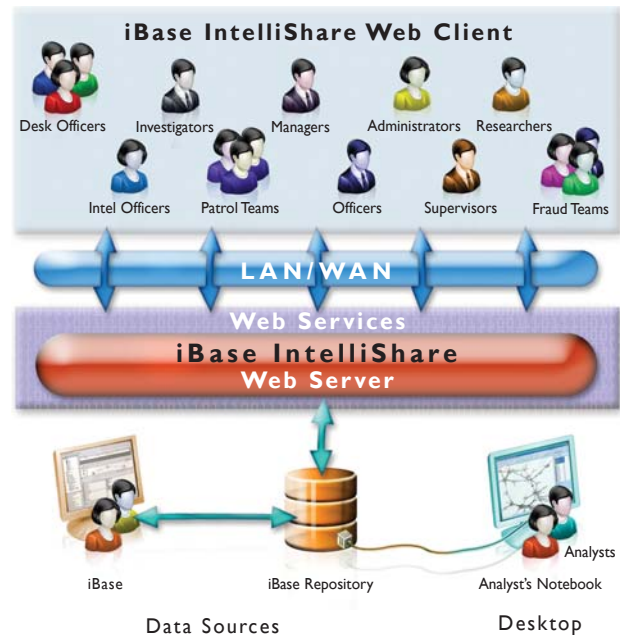

Accelerating Your Mission.

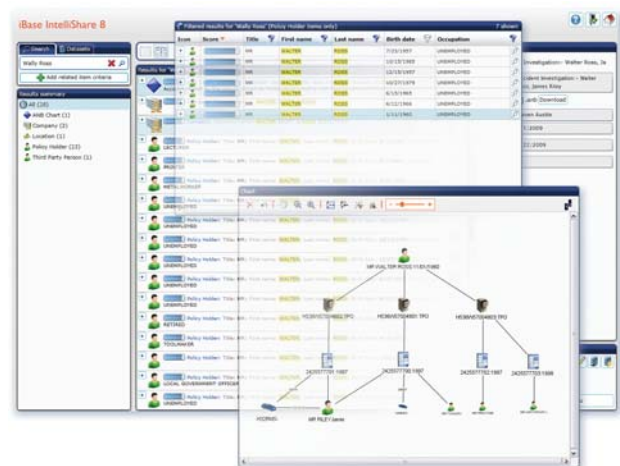

*iBase IntelliShare 8* is a Web-based application providing self-service real-time access to intelligence stored in *iBase* repositories; enabling faster, informed decision making and empowering collaboration.

The *iBase* database is the analytical intelligence repository at the heart of i2's Intelligence-Led Operations Platform (IOP). *iBase* supports the needs of analysts to capture, control and analyse multi-source data in a secure environment through its rich functionality and tight integration with *Analyst's Notebook*.

*iBase IntelliShare* extends *iBase* to the wider operational team by providing self-service dedicated modules for contributing key information at the time it becomes available, and access to the high value intelligence and analytical products held in the *iBase* repository. This broader user community can find, explore and/or contribute to the rich intelligence in the repository through an easy to use Web interface. *iBase IntelliShare* allows analysts and operational teams to increase productivity by working concurrently and collaboratively on the same data to make faster and better informed decisions.

## Contribute, share and analyse data stored in your *iBase* repository.

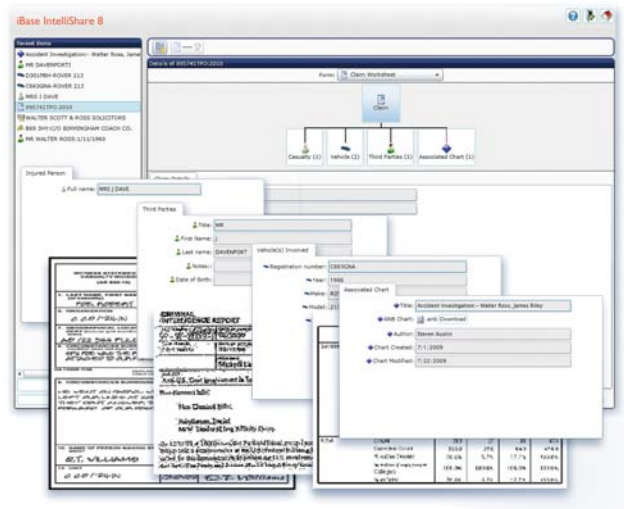

Powerful filtering and visualisation capabilities help users search and find data quickly and intuitively

## Ensure valuable intelligence is available immediately with real-time data access

- Intuitive, task-oriented dedicated web-based modules can be used across the operational team
- Discover all possible intelligence pertinent to an enquiry through single-click searching using i2's most powerful search technology ever, Search 360
- Zero in on relevant results with greater efficiency
- Visualisation tools give users the ability to quickly identify associations, networks, clusters, and patterns

## Promotes collaboration by extending the value of iBase intelligence and analysis to the entire team

- Empowering analysts to provide 24/7 support for the entire team
- Boost productivity by allowing the analysts to push and pull data to and from the operational team
- Eliminate interdepartmental information silos giving members of the wider operational team the ability to explore, share, and augment data in a single repository
- Organisations can leverage the flexible and robust security layer in iBase, ensuring compliance with enterprise rules while enabling seamless Web and desktop access

Secure intuitive forms to facilitate knowledge transfer across the entire operational workforce

## Benefit from the full capabilities of iBase IntelliShare with these modules

### Access to intelligence on demand Find & Explore

- Find information using i2's Search 360 technology
- Single search across all records, charts and documents
- Post-filtering (including date ranges) and sorting enabled
- Retain key information for reuse and sharing
- Visualise facts, events, and associations

### Accelerate knowledge transfer with Data Entry

- Easy to understand and secured forms remove the need for analysts to perform data entry
  - Create, view, and edit entities
  - Add links between entities
  - Grow and edit networks in real time
  - Upload documents and pictures to support information provision
